Dickensheets Joins T&T Bisso Response

HOUSTON (June 25, 2009) – The T&T Bisso Response Network, an industry leader in vessel emergency response, salvage and marine firefighting services, is pleased to announce the addition of Tim Dickensheets to its team.

Dickensheets will serve as director of Vessel Response Services for the company’s Oil Pollution Act of 1990 (OPA 90) Emergency Response, Salvage and Marine Firefighting team.

“Tim has the background and experience in the U.S. and international maritime communities that will make him a valuable new member of the T&T Bisso Response family,” said Mauricio Garrido, the company’s general manager for the Americas and Europe.

Dickensheets began his career in emergency response addressing oil and chemical incident management for both vessels and facilities. He has spent the last 19 years in the Spill Management and Qualified Individual arena using his background in environmental management, maritime security, pollution prevention and response, corporate crisis management and federal and state agency partnering.

“Tim’s diverse background and his strong relationship with both shipowners and underwriters will offer a smooth integration into an incident management system,” Garrido said.

Formed in 2005, T&T Bisso is a stand-alone response contractor servicing the maritime, shipping and offshore energy industries. T&T Bisso combines the resources and experience of T&T Marine Salvage, which was founded in 1957, and Bisso Marine Company, founded in 1890. T&T Bisso’s worldwide response network includes firefighting systems, inert gas generators, nitrogen generators, ship-to-ship pumping and lightering systems, pulling systems and diving systems.
